

SHANE BELL

Senior PHP Developer (Laravel)

Luton, UK | Right to work in UK: Yes | 07565 727032 | shane1obdurate@gmail.com

shanebell.dev | linkedin.com/in/shanebell-ai-developer | github.com/shanebell

PROFESSIONAL SUMMARY

PHP/Laravel developer with 6+ years of production experience: six years writing and maintaining PHP systems for a national utility company, followed by two years designing, building and shipping Laravel SaaS products independently. Comfortable owning backend architecture end-to-end database design, REST APIs, authentication, third-party integrations and deployment within a framework-driven codebase. I worked directly with DBAs, analysts and non-technical stakeholders to turn operational problems into production software, and has mentored junior developers along the way.

TECHNICAL SKILLS

- PHP & Frameworks: PHP 8, Laravel (Breeze, Horizon, Forge), MVC architecture, Composer, REST API design, PHPUnit
- Databases: MySQL, PostgreSQL, schema design, query optimisation
- Integrations & Payments: Stripe API, OpenAI API, webhooks, Resend, third-party REST APIs
- Frontend (complementary): Vue.js 3, Inertia.js, TypeScript, JavaScript, TailwindCSS, HTML5/CSS3
- DevOps & Tools: Git/GitHub, CI/CD, Laravel Forge, DigitalOcean, Linux, Microsoft Azure (migration support)
- Practices: Agile/Scrum, code review, mentoring, legacy system modernisation

WORK EXPERIENCE

Freelance PHP/Laravel Developer *Apr 2024 – Present*

Self-Employed | Luton, UK (Remote)

- Design and build Laravel applications for clients and own SaaS products, covering backend architecture, database schema, authentication and third-party integrations.
- Built InvoiceFeed, a live invoicing and billing platform, on a Laravel backend with multi-tenant auth via Laravel Breeze, role-based access control, and Stripe one-time and recurring payments.
- Built Blendable, a multi-model AI chat platform, on Laravel and Laravel Horizon, with Stripe billing, usage/quota tracking and team workspace management.
- Built and deployed a Laravel booking and admin platform for a restaurant client, including reservations, events management and a full admin dashboard.
- Manage deployment and CI/CD using Laravel Forge, GitHub and DigitalOcean, including production monitoring.

Software Engineer / Programmer Analyst *Jul 2018 – Apr 2024*

National Water Commission | Kingston, Jamaica

- Developed and maintained internal and public-facing PHP applications (PHP, Laravel, MySQL, PostgreSQL) used across multiple departments.
- Modernised legacy PHP systems into more secure, maintainable applications, working within an existing framework rather than rebuilding from scratch.
- Built reporting tools and data-driven dashboards used by managers, executives and operational teams.
- Worked directly with DBAs, analysts and non-technical stakeholders to translate operational requirements into working software.
- Supported a cloud migration involving Microsoft Azure, including testing, data analysis and integration work.
- Mentored junior developers and helped set coding standards across the team.

SELECTED PROJECTS

InvoiceFeed: Laravel, Vue 3, MySQL, Stripe | invoicefeed.com

Live SaaS invoicing platform built solo, from database schema through to production deployment.

Blendable: Laravel, Laravel Horizon, Vue.js, Stripe | blendable.app

Multi-model AI chat platform with team workspaces and usage-based billing.

Proposal AI: Laravel, Vue 3, OpenAI API, MySQL | shanebell.dev/proposal

SaaS tool that generates client proposals via GPT-4o mini, with a free/paid tier on Stripe.

EDUCATION

BSc in Computer Science: University of Technology, Jamaica (2012–2016)

Associate in Management Information Systems: Montego Bay Community College, Jamaica (2009–2011)
